

SAFETY FIRST PUPIL TRANSPORTATION TESTING

Safety First, a division of Behavioral Health Systems, Inc., provides comprehensive drug testing programs that include the following test types: reasonable cause, post-accident, return to duty, pre-employment, periodic and random. Safety First assists in policy development, the establishment of drug-free workplaces, and the coordination of educational training programs.

Key Features of the Pupil Transportation Testing Program

Safety First recognizes that a comprehensive approach to the problem is necessary—one which includes comprehensive policy development, staff education and training, a customized testing program and an effective support system for the intervention and recovery of employees who need help. Key features of the Safety First Pupil Transportation Testing program include:

- In depth policy review & development
- State-wide mobile unit
- Seamless student/parent substance abuse counseling
- Random number generator selection process
- Informative annual executive reports for board
- Web based reasonable suspicion training for supervisors
- MVR & PSP reports available with a simple click of the button
- Capability of incorporating both student and employee testing
- Statewide network of sites for local collections
- Our two MRO's possess over 60 years' DOT experience
- Competitive rates for school systems
- On demand MIS reports for DOT audits
